

Confidea FLEX

Meet Confidea FLEX. The most versatile tabletop conference device.

Meetings are more dynamic than ever. From the number of participants, over the meeting rooms, to the preparation and the management. Things change in an instant. And hardware and software need to adapt to enable meetings with focus and efficiency. It is time for a system that is as flexible as the meeting. A system that is easy to install, simple to operate, and user-friendly for participants. It is time for the next generation of wired discussion. With **Confidea FLEX**.

“Confidea FLEX is a brand-new tabletop conference device with a touch screen. It comes with flexible hardware and software options to adapt to the needs of any meeting. Large or small conference, chairperson or delegate, simple discussion, voting or multilingual conference. Confidea FLEX changes with you and with the meeting.

Flexibility matters more than ever.

- » **Integrators** want hardware that is simple to install and easy to configure, no matter the size or the venue. They want speed and options.
- » **Chairpersons** need clear tools to run meetings without confusion or interruption. They want meetings that flow.
- » **Delegates** want more information and a better view of the meeting. They want the right functionality at their fingertips.

Beauty that's more than screen deep.

The new Confidea FLEX has been designed to feel at home everywhere: from a boardroom table over a city council to a large conference venue. The goal? To blend **modern design with a compact form factor and stability**. And while the touch screen may be the center of attention, the design of Confidea FLEX goes much deeper.

Confidea FLEX starts from a durable alloy of zinc and aluminum to create a stable device that does not budge at all when you move around the microphone. It was expertly adjusted to ensure a **flawless weight distribution**.

The outside of Confidea FLEX contrasts a large surface area with tight curves to create a playful tension. And its low profile takes up very little space. The result is a device that looks both **modern and accessible**.

On the inside, every inch of the electronics was engineered to fit the tight constraints of the device. The result is the **most compact touch screen table-top device on the market**.

See & Feel the Difference.

The Confidea FLEX touch screen gives you additional controls and information. It allows you to see what is relevant on-screen depending on the context: agenda, voting, and more.

Confidea FLEX does not just look different. It feels different, too. For special interactions such as voting, the display uses **haptic feedback**. The screen recreates the physical touch experience by gently vibrating. Select a voting option, and the display will respond to give you an extra layer of confidence in casting a vote.

For visually impaired users, Confidea FLEX offers tactile guides underneath the microphone button and underneath the screen to make the device easier to use for everyone.

True flexibility right at your fingertips.

- 1 5.2-inch Full-color Touch Screen**
Haptic feedback and anti-fingerprint coating
- 2 3.5 mm Headphone Jack**
Left and right side for easy access
- 3 Badge Reader Slot**
Including NFC: insert badge or tap to identify
- 4 Microphone Button with Hidden LEDs**
LED icons light up depending on functionality and activated license: Microphone, Dual Microphone, Priority
- 5 Tactile Guides**
Three dots underneath microphone button, individual dots underneath touch screen and volume buttons
- 6 Screw-lock Microphone Connector**
For use with 30, 40, or 50 cm Confidea D-MIC microphones
- 7 Bluetooth® Support**
For use with Bluetooth® hearing aids
- 8 Built-in Speaker**
Engineered with Televic rich sound processing
- 9 Dual Status LEDs (Back)**
Display active microphone or request-to-speak status
- 10 Dual Plixus® Ports (Bottom)**
RJ 45 conference ports for use on the Plixus® network
- 11 Screw Openings (Bottom)**
Option to fix unit to table

One Confidea FLEX, multiple faces.

By using a **flexible, software-based license system**, Confidea FLEX easily adapts to the meeting or to the venue. From voting to simultaneous interpretation and more. Activating or deactivating a license is possible with just a tap.

- » Light up microphone buttons depending on the functionality (delegate or chairperson)
- » Change the priority of a unit in a snap
- » Easily add or remove the functionality through a license

The result is also a system that can **grow with the needs of a room**. Effortlessly add licenses, and the functionality of the device expands, too.

Available Licenses

L-Vote Enable voting options	71.98.1401
L-Identification Enable badge identification	71.98.1402
L-Language Enable channel selection in meetings with simultaneous interpretation	71.98.1403
L-Dual Enable two delegates to use a single unit	71.98.1404
L-Bluetooth® Enable Bluetooth® communication	71.98.1405

Chairpersons Are in Control

- » Start and pause meetings
- » Use next-in-line to select the next person in a request list
- » Record meetings
- » Manage the agenda
- » Manage voting sessions

Delegates Are in the Know

- » See active agenda item
- » See who is speaking
- » View speech time
- » See the speaker list
- » See the number of people in request
- » Vote and see results

Operators Create Flow

- » Add a custom welcome screen
- » Display the participant name on screen for fixed seating
- » Show a welcome message

Enjoy all the benefits of the Plixus® network.

Confidea FLEX works seamlessly with the Plixus® network architecture. Just connect a standard shielded network cable and Confidea FLEX is ready to go, powered over the Plixus® network. Devices also work in loop for maximum reliability.

Benefits

- » Uses standard shielded CAT 5e cables
- » Closed core, open edge with Dante™
- » Up to 64 HQ audio channels
- » Up to 6 Full HD video streams
- » Loop cabling & hot-swap

Get unparalleled flexibility and cutting-edge features. From smaller audio-only rooms to complex large-scale multimedia projects. Combine flushmount and tabletop devices. Or mix wired and wireless units. Provide chairpersons with even more control over the meeting using a multimedia device. Plus, get innovative and user-friendly interpretation. And tie it all together with versatile video distribution to give every participant a perfect view of the meeting. **Only on Plixus.**

- » **Performance:** more bandwidth, better quality and less latency
- » **Security:** fully isolated foreign IP traffic, no 3rd party interference
- » **Reliability:** self-healing technology for mission-critical conference networks
